

I am going to ask you to follow my instructions and draw a diagram without lifting your pencil from your paper. Now listen very carefully because you will need to follow my instructions step by step in order to complete this assignment correctly. If you are unable to follow my instructions, you will not pass this test.

We will begin now... take your pencil and draw a line from point D6 to F7, take your pencil from F7 to C3 now see if you can go from C3 to A1 and now to B4. Don't forget to keep your pencil on the paper without lifting it for a second. Take your pencil and go from B4 to F7 now draw a line from F7 to A1, can you find D6? Go to D6 and then move to B4, keep your pencil on the paper, now go to G8 and finally back to D6.

If you were able to follow my instructions, the picture should be clear to you now. Are you ready to do this again or would you like to stop here? Let's stop and see how you did.

1. Why are you wearing that shirt today? You look terrible! Aren't you embarrassed? You have stains on it. You didn't do your laundry did you? You never do you laundry! You are such an embarrassment!

2. What's this guy trying to do? He's not making any sense! Don't listen to him, aren't you tired? Let's just go home. Hey you're cheating!! He said L5 not G4, you're so stupid!

3. Good morning Central Florida. Today's forecast is clear skies with zero chance of rain. Stay tuned for more sweet sounds from the late Ella Fitzgerald coming to you from WJZZ 109.9
